كۆمپانىيە دىلسۆز
Delsoz Company

Core Services:

Delsoz Company has proudly helped in providing more than 2,000 villages with reliable electrical power through the supply of various electrical network products. Delsoz Company has a very versatile scope which includes:

- Electrical Material Supply
- Supply and Installation of Switchgear units
- Lighting System Design and Installation
- Mobile plant/substations
- Implementing 132KV Tower OH line
- Supply and Installation of Ring main units
- Electrical Engineering Services
- Design and implement Solar system
- CAD Drafting of Electrical Systems

Also our team consists of professional and qualified electrical engineers who conduct our services. With this diverse skillset, Delsoz Company has the expertise to tailor solutions to meet the diverse and specific requirements of all its clients, providing innovative and highly competitive services.

Testing & Commissioning of MV and HV substations.

We offer full range of services for power systems reflecting real-world solutions turning any engineering recommendations through to full implementation involving the testing and commissioning activities. also, we offer predictive maintenance, acceptance testing, repair and upgrade services to protect the critical electrical distribution systems of client's facility. With our portfolio covering from industrial plants to government power facilities thus our engineers are prepared to assist with keeping the facilities operating properly.

Our nationwide Kurdistan experience in electrical engineering services enabling us to comply with vital electrical regulations imposed by various authorities for electrical testing services. We understand thoroughly the objectives and its findings for each testing activity with safety practices to keep up the compliant project site.

We provide the most knowledgeable electrical testing engineers in the industry having capability to work with standard and latest testing procedures as par with international electrical testing practices.

Testing and Commissioning is the main source to keep system or Equipment in safe and active. We are strengthened by our Experienced Professional Engineers who are aware to handle site with safety, quality, efficiency and dedicative work on the system. The Kit and Measuring Tools we provide will be calibrated to standard. Our engineers periodically undergo required safety, Product, Software training.
